Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because lines 1-2 do not constitute as a complete sentence. The sentence lacks a proper action verb. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Chu et al (#6,623,078).

Chu et al show a chair (10) comprising a base assembly (11), a seat (14) supported by the base assembly, a pair of uprights (31) connected to the base assembly and extending upwardly above the seat, wherein each upright has a longitudinal axis. An armrest (61) is selectively positioned along each upright. A backrest is disposed between the uprights.

With claims 2 and 19, each armrest has a mount sleeve and the backrest has a pair of mount sleeves.

Art Unit: 3636

With claims 3 and 13, the mount sleeves each have a cylindrical profile.

With claim 4, the uprights extend upwardly from opposite sides of the seat.

With claims 5 and 20, each upright has a channel extending along a least a portion of each of the mount sleeves.

With claims 6 and 14, each upright has a series of spaced holes.

With claims 7 and 15, each retention member is mounted to a respective mount sleeve.

With claims 8, 16, and 21-22, each mount sleeve has a biasing member biasing the retention member to the first position.

With claims 9 and 17, the uprights are each attached to a base member.

With claim 10, a brace member is connected to upper end portions of the uprights.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Branick, Anderson, Hemminger et al, and Conning are cited as showing similar types of chair.
